- Postman

WORK EXPERIENCE

ASHSTONE STUDIOS
Yerevan
Oct 2025 - Present

Front-End Enginner

- Developed and customized Shopify themes using native JavaScript and SCSS to support front-end requirements
- Implemented interactive UI components in Shopify stores with vanilla JavaScript, ensuring compatibility with Shopify's templating structure
- Styled and refined responsive layouts using SCSS to improve visual consistency across pages and devices
- Collaborated on React-based side projects to build reusable front-end components and enhance overall user interface behavior

KIIP EDUCATION CENTER
Yerevan
Mar 2025 - Present

Full-Stack Enginner

Real-Time Classroom Platform

- Designed and developed a full-stack classroom platform independently, enabling real-time communication between users
- Implemented **WebRTC-based(SFU Architecture) video calling** and **WebSocket-powered real-time chat** for seamless live interaction
- Built an interactive **whiteboard feature** for collaborative sessions
- Developed functionality for **file uploading, management, and in-app editing** of lesson materials
- Designed a scalable **hierarchical (tree-based) structure** for organizing programs and lessons
- Optimized performance for content-heavy pages and ensured stable real-time connections
- Integrated front-end and Express.js-based backend, handling both UI/UX and server-side logic

Additionally, providing front-end support for a PHP-based website, implementing new features, and executing UI fixes. Responsible for website maintenance and configuration through cPanel, including file management and deployment workflows.

Technologies Used: React, TypeScript, Zustand, Node.js, Express.js, WebSocket, WebRTC, JavaScript, PHP, SQL, MySQL, HTML, CSS, jQuery, Bootstrap, Cpanel / Hosting, VPS server configuration

MINISTRY OF DEFENCE OF THE REPUBLIC OF ARMENIA
Yerevan
May 2025 - Aug 2025

Front-End Enginner

- Led a full redesign of the Water Committee of RA MTAI website using the existing PHP/jQuery stack to modernize its look and feel
- Improved UI/UX by refining page layouts, visual hierarchy, and interaction patterns while preserving core functionality
- Ensured design and component consistency across pages by standardizing styles, elements, and reusable interface patterns
- Enhanced code readability and structure by reorganizing files, refactoring front-end logic, and clarifying naming conventions
- Optimized styles by consolidating CSS rules, reducing redundancy, and improving maintainability of the front-end layer
- Cleaned up legacy code and removed unused assets to simplify the codebase and ease future development
- Organized front-end assets, including scripts, styles, and media, to support better long-term maintenance and collaboration

BOOMTECH
Yerevan
Mar 2024 - Apr 2025

Front-End Engineer

Projects: QR tickets, Ticket payment options, Page editor/builder, Email template builder, Registration, Calendar weather forecast, among others.
